Subject: dimock

thanks for the heads up Linda.

1. Could someone please send me the link to the updated info on your website.
2. Are you aware that Beth Doyle, OW/OST called on OEM to help interpret the info, as they are the folks who typically do site specific (cumulative) risk assessments?
3. It would be helpful if you could lay out a schedule so that everyone is aware when and how the results of our various reviews need to be ready?
4. Ralph, where are you in looking at the data provided by Region 3? I think everyone is interested in the finesse you can provide to help interpret the meanings of the analytical results.
5. I'd be happy to chat. On Monday, I am available 12-1 pm only. We are crashing in preparing for back to back meetings with API and ANGA on T and W. Are others available then?

Thanks,

Jeanne

Heinz and Lisa Daniels were reached. Karen was still trying to get Scott. Heinz question was were we going to do some press this weekend. We said no, we wanted them to know ASAP so they could decide what they wanted to do. 1) Levels above new risk levels just posted -= toxicologists meeting on Monday afternoon. 2) Results showed organics on Friday not previously shown before 3) were samples Cabot took total metals. Jeanne Briskin, I wanted to make sure you are aware that the risk levels on our EPA website were updated a few days ago. Please talk with Vicky or Karen on Monday. Shawn talked with Bob Sussman today to let him know that our toxicologist will be talking on Monday.
